

eLibrary[®] Elementary

Online reference for beginning researchers

Easy to Use, Learn, and Teach

eLibrary Elementary is an easy-to-use general reference resource, designed specifically to engage and guide beginning and younger researchers.

Via a colorful, graphically engaging interface, children have access to over 300 full-text magazines, newspapers, transcripts, and reference books—plus millions of kid-friendly images, maps, websites, videos, and interactive simulations not found in other online reference resources.

Whether it's fact checking, homework help, or classroom projects, it's easy for elementary students to find the answers they need with eLibrary Elementary.

Unique features in eLibrary Elementary make it simple for schools and libraries to incorporate the millions of supplemental resources directly into instruction and research:

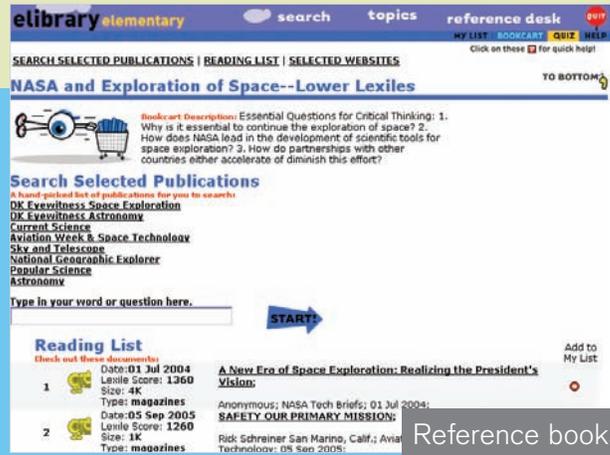

- **Graphical content** delivers colorful, high-resolution images—from today's current events to ancient works of art—ready for use in presentations and projects.
- **Multimedia content** includes interactive video, animations, and vetted websites that demonstrate concepts through seeing and doing.
- **Reference content** from over 200 encyclopedias, atlases, dictionaries, almanacs, and biographies provide essential background, terminology, and facts on any topic.
- **Lexile & reading level indexing** for every document allows users to locate information appropriate to learning needs and skill level.
- **Study units & lesson plan tools** provide instant lessons, activities, and resources on the most-studied topics, and include the ability to customize content, collaborate and share lesson plans, and generate quizzes.

“eLibrary helps targets digital resources to the specific learning and reading needs of students... this enables me to have a closer collaborative relationship with classroom teachers.” —Donna S. Swarr, Library Media Specialist, Hartford, CT

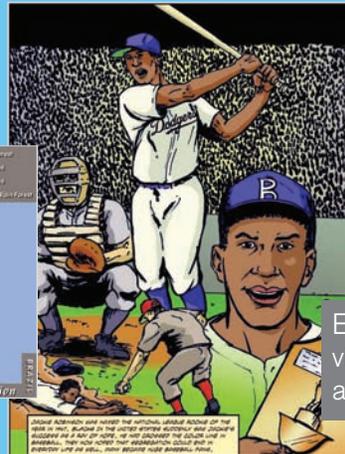

Videos. Biographies. Pictures. Current Events. Maps. Encyclopedias. Websites.

Kid-friendly search, kid-friendly content

Reference books and tools that help jumpstart research

Engaging online graphics, videos, full-text articles, and websites

Built for Young Researchers

Find information by keyword, phrase, or Boolean search; or browse by topic, reference desk, or publication. Target content by popular fields such as Lexile, source type, and date; and then, view, print, or email results in one easy step.

Additional tools like My List and BookCarts help students complete coursework; and give teachers the ability to tie content to curriculum, classroom assignments, and learning standards.
